

Bell & Howell Super 8 MOVIE LITE

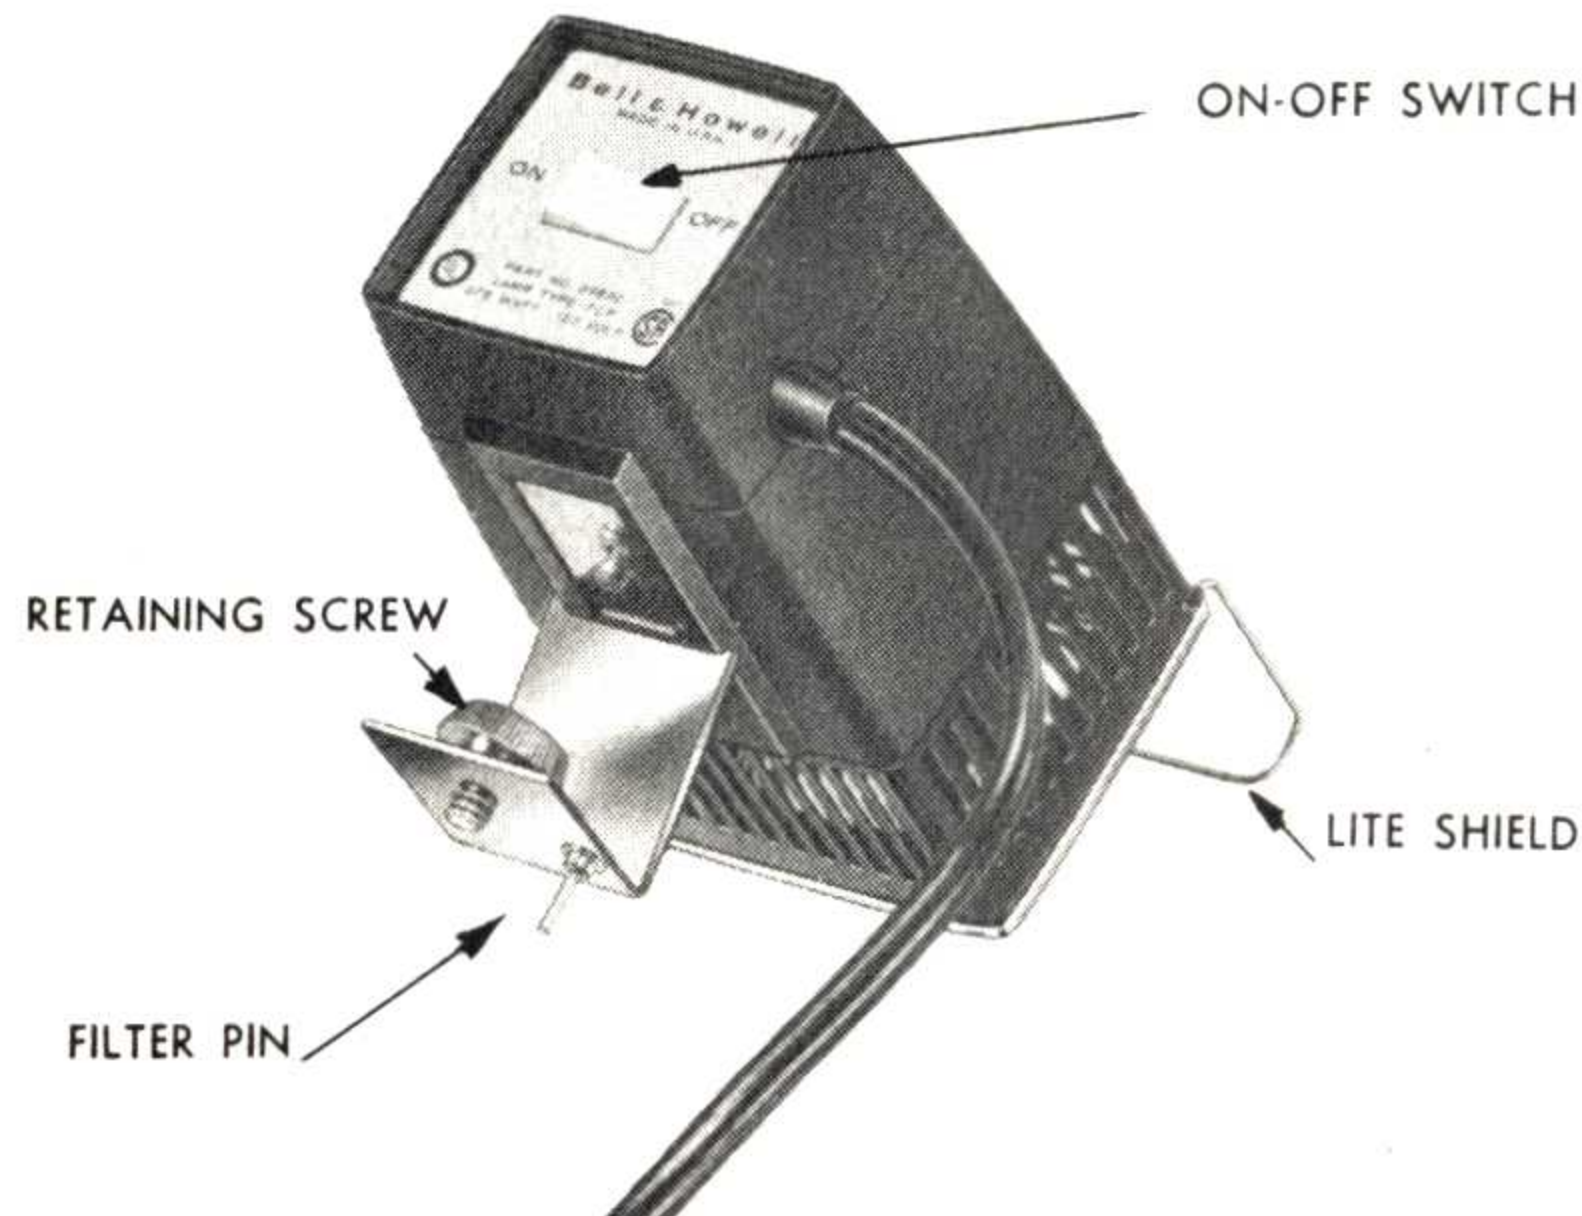

YOUR BELL & HOWELL SUPER 8 MOVIE LITE *Is Easy to Use!*

Congratulations on your recent purchase of the all new Bell & Howell Super 8 Movie Lite. This new Movie Lite is specifically designed to be used with the all new Bell & Howell Super 8 Cameras. The exclusive mounting bracket has a built-in Filter Pin which automatically positions the filter properly for indoor movies.

To mount your Movie Lite, unscrew the screw-type plug in the Accessory Socket with a coin or screwdriver. Guide the Filter Pin into the Filter Pin Socket and the Retaining Screw into the Accessory Socket. The Retaining Screw must then be tightened firmly to assure proper positioning of the filter. Now simply plug the Line Cord into any ordinary household electrical out-

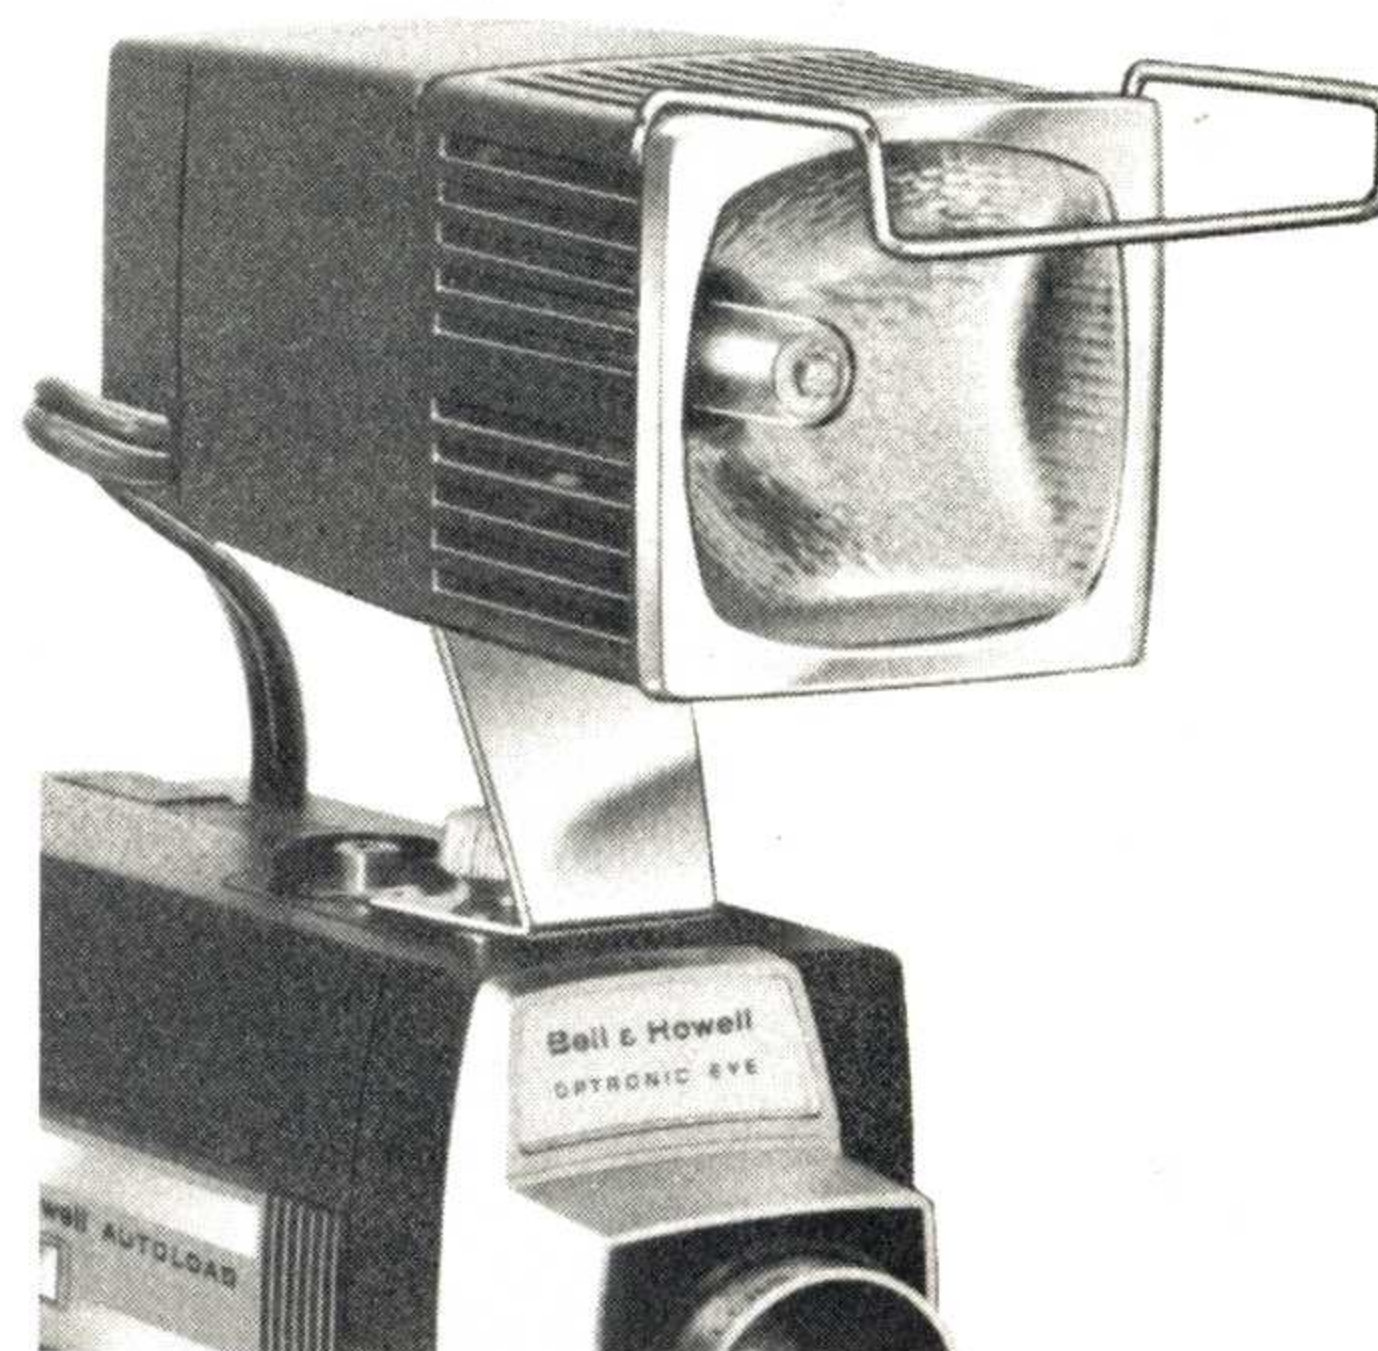

let, turn the power switch to the "on" position and you're on your way to brighter-sharper indoor movies.

TO REPLACE LAMP: First, unplug the cord. Wait for the lamp to cool. To remove the old lamp, simply unscrew as you would an ordinary light bulb. Insert the new lamp (Type FCP) and screw firmly into place.

Note: Before operating your Bell & Howell Movie Lite, be certain that the Lite Shield is positioned properly in front of the Lite's reflector. This Shield prevents direct contact with the hot surface of the Lite.

Bell & Howell Super 8 MOVIE LITE
